All About Hedgehogs

Hedgehogs are small, spiky animals that live in the wild. They are found anywhere in the UK and live in cities, towns and even your back garden! Read on to find out more.

What do they look like?

Hedgehogs have hard spines on their back, sides and head. They have small, powerful legs. Some hedgehogs have a brown or black mask around their eyes.

What do they eat?

Hedgehogs are carnivores. They eat slugs and they also like small creatures like insects and bugs. They love earthworms especially!

Where do they live?

They like to live in parks, woodlands and anywhere that has grass. They are nocturnal animals and spend the day sleeping under leaves or in holes. You won't see hedgehogs much in the winter as they hibernate.

Fun fact

Hedgehogs are really good swimmers and can swim across small ponds!
