

Model Text – How to Make a Time Machine Instructions

Do you want to know how to go back in time to see your great-grandparents? Follow these instructions to learn how.

You will need:

- A giant police box.
- Magic moon dust.
- Energy from the sun.
- A controller.
- A parachute

What to do:

First, sprinkle some moon dust around the outside of the police box. This will protect your time machine on your journey.

Next, jump inside your police box so you are ready to go.

Then, pour some energy from the sun into the engine. This will make the time machine blast off through time.

After that, use the controller to control where you want to go.

Finally, press the parachute button to slow your time machine as you get closer to your destination.

Warning:

Don't forget that when you land, you may be somewhere completely new, so take a map with you just in case!
