Sensational Seasons!

Spring

March, April, May

New plants grow and the trees grow their leaves back.

Summer

June, July, August

The days are at their longest and the weather is the warmest. The trees are full of leaves.

Autumn

September, October, November

Leaves change colour and fall off the trees.

Winter

December, January, February

Deciduous trees have no leaves and the amount of time it is light during the day is at its shortest.
